DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 22, 2006 has been entered.

Allowable Subject Matter

Claims 14-17 and 19-27 are allowed.

The following is an examiner's statement of reasons for allowance: Pouyani et al (US 5,616,568) teaches the preparation of a derivative of HA having a functional group attached via a carboxylic acid moiety. The derivative is crosslinked to form a hydrogel. See for example Scheme 2 and col 3, lines 44-51. Furthermore, the reference specifically suggests the reaction of these derivatives with an activated ester to prepare a conjugate. See the paragraph bridging col 2-3 and example 3. However, while the preparation of HA activated esters is known, (see discussion of Righetto et al in previous Office actions) one of ordinary skill would not be motivated to incorporate the additional step of preparing the activated ester before preparing the hydrazide derivative, as required by the instant method.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
